AGAMER WHITE PAPER

Version 1.0 — 13 Oct 2026. On-chain figures are a snapshot from 13 Oct 2026, 22:52 (UTC+2).

1. Abstract

AGAMER is a community token on The Open Network (TON), launched on 20 April 2025 as the official coin of the Agamer channel. It is designed to be the main currency of **Agamer Universe**, a Telegram gaming hub with several games, together with the 1,000-piece Agamer NFT collection. The contract's admin rights are revoked, so supply can never be increased. AGAMER trades in 5 liquidity pools on STON.fi and DeDust.

2. Vision and problem

Many community tokens are given away through airdrops and have no lasting use. Agamer's stated approach (channel post, 30 Jan 2026) is "No meaningless airdrops": AGAMER is earned through gameplay and utility inside Agamer Universe, and Agamer NFTs give real in-game utility, where rarity matters and holders can win cash prizes, valuable items and other real-world rewards.

Long-term vision: Agamer wants to grow into a full gaming hub, Agamer Universe, where AGAMER is the main in-game currency and Agamer NFTs give status, access and real rewards. The project plans to expand into minigames and interactive challenges, to build its own art, lore and storytelling, to work with creators, artists and gaming communities, and to form cross-project partnerships in Web3 and gaming. Target audience: Telegram and TON gamers, NFT collectors and the Agamer community.

3. The AGAMER token

Token at a glance

Name / ticker	AGAMER coin / **AGAMER**
Blockchain	TON (Jetton standard)
Contract	`EQA5qN_40wF_i8ZPfX5YD-ypK-PagNSbvSrrtqYDZ45pbIKs`
Decimals	9
Initial supply	1,000,000 AGAMER (launch announcement, 20 Apr 2025)
Current total supply	**999,000 AGAMER** (1,000 AGAMER burned)
Admin rights	**Revoked** — admin is the zero address, so no one can mint new tokens or change the contract
Holders	421
Launch	20 Apr 2025, liquidity first added on STON.fi
Price (snapshot)	$0.018458 · 0.01337 TON
FDV (snapshot)	$18,439

Total DEX liquidity	$1,739.20 across 5 pools

Burn history: the supply announced at launch was 1,000,000 AGAMER. The current on-chain supply is 999,000. The project creator burned 1,000 AGAMER.

4. Tokenomics

Allocation

Allocation	Share	Amount	Vesting / lock
Organic distribution — rewards to active community participants	not fixed	—	none
Burned by the project creator	0.10%	1,000	permanent

AGAMER had no pre-set allocation split and no vesting schedule. According to the founder, tokens were handed out over time as rewards to active community members (giveaways, airdrops to holders, contests), and part of the supply was added as DEX liquidity. You can check the current distribution on-chain in the top-holders table and on tonviewer.

Utility: AGAMER is the main currency of Agamer Universe. It is earned through gameplay and utility rather than meaningless airdrops, and it is meant for in-game payments and rewards. Holdings are already used as entry requirements and tickets for community giveaways (for example "100 Agamer = 1 ticket" and "1000+ Agamer to join"), and AGAMER is used for Agamer NFT upgrades and promotions through the Agamer wheel. Additional sinks and burns: to be announced.

Top-10 holders

#	Address	Label	AGAMER	% of supply
1	UQBo2c…RP8z5G	bots.ton (holder wallet)	32,243.26	3.23%
2	UQBaeL…_24Ud0	Holder wallet	25,000.00	2.50%
3	UQCyR2…WN8cQK	Holder wallet	23,941.73	2.40%
4	EQBCtI…Hwfq31	STON.fi DEX (router/vault — holds reserves of both STON.fi v2 pools)	23,719.26	2.37%
5	UQCFoP…u4-EcA	defex-wallet.ton (holder wallet)	15,750.00	1.58%
6	EQCmqu…cYmoKF	DeDust v2 AGAMER/USDT pool	13,121.82	1.31%
7	UQCl9c…1Y46xY	Holder wallet	12,160.94	1.22%
8	UQA6-s…uk6hRM	**Creator — aleksionis.ton**	11,483.07	1.15%
9	UQAzlK…Gxch7e	Holder wallet	11,288.65	1.13%
10	UQD78Y…cqy2hu	mffff4wallet.ton (holder wallet)	11,208.00	1.12%

The project wallet (agamer-wallet.ton) is not in the top 10 (0.69%). The top 10 hold 18.01% combined. No burn address is listed, because tokens were burned (supply reduced) rather than sent to a dead address.

5. Ecosystem

- **Agamer Universe** (@agameruniversebot) — the gaming hub in a Telegram bot, with multiple games inside. It runs the Agamer wheel and Agamer giveaways. Games and reward mechanics: to be announced.
- **Agamer NFT** (getgems.io/agamer) — launched 4 Jul 2025, with a hard cap of 1,000 NFTs. Rarities are VIP (only 55), Common, Rare, Epic and Legendary. Special editions (Human, Universe, Fire, Unix…) are minted in small fixed batches. NFTs were airdropped to AGAMER holders, and common NFTs can be upgraded through the Agamer wheel.
- **Agamer Marketplace** — launched in 2025.
- **Community** — channel @agamer_channel (7,563 subscribers), chat @agamer_chat, plus the NFT and holders communities (@agamer_nft, @agamer_community).
- **Website** — agamer.space, first launched in Nov 2025 and rebuilt in Oct 2026.
- **Price widgets** — Android (APK) and iOS (Scriptable) home-screen widgets released in Oct 2026. They show live price, chart, pools and trades from all 5 pools.
- **@AgamerPriceBot** — a Telegram bot released in Oct 2026. Its /price command sends a candlestick chart, /pools lists the pools and /trades shows recent trades (EN/RU/FA). It also posts buy alerts in @agamer_chat.
- **Sticker pack** — AgamerUniverse.

6. Liquidity and markets

DEX	Pair	Pool	Liquidity	Volume 24h
STON.fi v2	AGAMER/TON	EQBOXw…Y0w257	$702.95	$7.60
DeDust v2	AGAMER/USDT	EQCmqu…cYmoKF	$494.48	$3.94
DeDust v2	AGAMER/TON	EQDY9A…6ukYvv	$212.84	$0.95
STON.fi v2	AGAMER/USDT	EQBQ76…4AraNs	$170.69	$0.12
DeDust	AGAMER/TON	EQAWUK…rXe39f	$158.24	$0.80

Liquidity policy: the founder says he burns the LP tokens for all liquidity he adds, so that liquidity cannot be withdrawn. One example is visible on-chain: on 26 Aug 2026 aleksionis.ton sent 114.08 AGAMER-GRAM LP tokens to the zero address (tx). LP burns for the other pools were not checked individually and are given here as the founder's stated policy.

Listings: a CoinGecko request (ID CL1310260032) and a CoinMarketCap request were submitted in Oct 2026. A pull request to the TON community asset list (ton-assets) is open. The token also trades on GeckoTerminal and DexScreener.

7. Community and security

- Admin rights on the jetton are revoked, so it has a fixed supply.
- Official wallets are published, so anyone can check them on-chain:

Official wallets

Wallet	Address	AGAMER balance	% of supply
Project / Agamer Universe wallet — agamer-wallet.ton	UQDpPuDTghSF1KAvkKGAlPj0lyXbHP7ZvG3N-ZCcNoGl5_D1	6,844.37	0.69%
Creator — aleksionis.ton	UQA6-sBoMHIvTpNiOSGHdQ9nybQ2JJISx9Wc6TEhgXuk6hRM	11,483.07	1.15%

- **Bot-farm cleanup (Oct 2026):** mass bot and spam accounts were found and removed from the community chats to protect real holders and giveaways.
- **Contract security:** AGAMER uses the standard TON jetton contract, with admin rights revoked (the admin is the zero address). The contract has been checked by automated blockchain verification systems (e.g. explorer/tonviewer checks). No independent manual audit has been done.

8. Roadmap

Done - 20 Apr 2025: AGAMER coin launched on TON with admin rights revoked and the first liquidity on STON.fi - Free airdrops for AGAMER holders - 4 Jul 2025: Agamer NFT collection launched, with a presale and an NFT airdrop to AGAMER holders - Agamer Marketplace launched (2025) - Nov 2025: agamer.space website launched - Community chats for NFT and coin holders, with regular giveaways - 5 liquidity pools on STON.fi and DeDust - Agamer Universe bot launched - Oct 2026: website rebuilt, CoinGecko and CoinMarketCap applications submitted, ton-assets PR opened - Oct 2026: price widgets for Android and iOS, and @AgamerPriceBot with buy alerts - Oct 2026: bot-farm cleanup in the community chats - Oct 2026: AgamerUniverse sticker pack

In progress - Moving the website to a dedicated server - Games in Agamer Universe - CoinGecko and CoinMarketCap listings - Regular activity on X (@agamercoin)

Next (from the Phase 2 plan, Nov 2025) - Q4 2026: first games in Agamer Universe - Gaming experiences (minigames, interactive challenges) (timing TBD) - Agamer community on the major social platforms (timing TBD) - Agamer art, lore and storytelling (timing TBD) - Collaborations with creators, artists and gaming communities (timing TBD) - Physical merch and premium collectibles (timing TBD) - Partnerships across Web3 and gaming (timing TBD)

9. Risks and disclaimer

This document is for information only. It is not financial advice or an offer of securities. Crypto assets are highly volatile, and the value of AGAMER can fall to zero. Liquidity is low (about $1.7K in total), so large trades can move the price a lot. Plans and timelines may change. Always do your own research and check the contract and wallets on-chain. Agamer is a community-driven project. There is no legal entity behind it.
